

Ruijie RG-S5700H Series Switches RGOS Release Notes, RGOS11.4(1)B42P1

Release Date: March 17, 2020

Contents

This document includes the following sections:

- Basic Information
- Hardware Supported
- Resolved Issues
- Changes
- Related Documentation
- Upgrade Files
- Upgrade Tips

Basic Information

Table 1 lists the basic information of the current release.

Table 1 Basic Information of the Current Release

Current Release	S5700H_RGOS 11.4(1)B42P1, Release(05172515)
Previous Release	RGOS 11.4(1)B42
Applicable Product	S5700H series
Category	Official

Use the **show version** command to display information about the software version.

Ruijie#show version
System description      : Ruijie 10G Ethernet Switch(S5750C-48GT4XS-H) By
Ruijie Networks
System start time       : 2018-05-29 15:03:21
System uptime           : 1:02:19:18
System hardware version : 1.40
System software version : S5700H_RGOS 11.4(1)B42P1, Release(05172516)
System patch number     : NA
System serial number    : G1M109S003135
System boot version     : 1.2.28
Module information:
  Slot 0 : S5750C-48GT4XS-H
  Cpu 0:
    Hardware version    : 1.40
    Boot version        : 1.2
    Software version     : S5700H_RGOS 11.4(1)B42P1, Release(05172516)
    Serial number       : G1M109S003135

```

Hardware Supported

Table 2 shows the hardware supported by the RGOS 11.4(1)B42P1 release.

Table 2 Hardware Models and the Supporting Releases

Hardware Model	Version	Description
S5750C-28GT4XS-H	1.00	Host
S5750C-28SFP4XS-H	1.00	Host
S5750C-48GT4XS-H	1.00	Host
RG-PD70I	1.00	Power module
RG-PA70I	1.00	Power module

Note

The hardware version number is rounded to the first decimal place. The numeral in the second decimal place does not change the supporting release.

Note

For detail, see Ruijie RG-S5750H Series Switches Hardware Installation and Reference Guide V1.C.

Resolved Issues

N/A

Changes

This section describes the changes.

New Software Features

Module	Ruijie Cloud
Function Change	Device management via Ruijie Cloud is supported.
CLI Change	N/A
Web Change	N/A
MIB Change	N/A

Module	Web
Function Change	The Web-based configuration is enabled by default.
CLI Change	N/A
Web Change	N/A
MIB Change	N/A
