

NWA55AXE

802.11ax (WiFi 6) Dual-Radio Outdoor PoE Access Point

Thinking of upgrading to the 11ax (WiFi 6) technology for your outdoor wireless network? Zyxel NWA55AXE is your answer! Designed for harsh outdoor environments, the IP55-rated, weatherproof NWA55AXE is the best WiFi 6 outdoor access point to extend your wireless network outside.

The embedded Zyxel Smart Mesh Technology not only forms dynamic wireless links between APs for extended range, but can also bridge the wireless connectivity from one building to another. It is no doubt that NWA55AXE is an ideal choice for a simple expansion of your outdoor wireless network or forming an interconnected wireless network through outdoor inter-building links.

The downward pointing antenna position of NWA55AXE provides better protection against rain and moisture, whereas the traditional, upward pointing antenna design is prone to water leaks, having a potential of damaging the access point's internals. The external, detachable antenna design allows users to attach other antennas to better suit different demands.

Perfect for small business owners or SOHO users, the NWA55AXE supports both local GUI management and Nebula Cloud networking management. The simple setup allows you to quickly configure the AP with only a few clicks, making it super easy to set up guest and employee network on your own and start enjoying the ultra-fast WiFi 6 speeds in no time.

Dual-radio (2x2) 802.11ax AP provides maximum data rate of 1775 Mbps

Smart Mesh automatically forms dynamic wireless links to bridge networks for interbuilding settings and mitigates complex, inconvenient cabling WiFi deployments

Excellent performance with WiFi 6 technology of highspeed transmission and low latency ensures a long-range of coverage for outdoor deployments

External, detachable antenna design allows users to attach other antennas that better suit different demands

Easy configuration setup with Zyxel's intuitive Nebula Cloud to get the network up and running in no time

Designed for harsh outdoor environment with up to IP55 weatherproof rating

Benefits

Effortless deployments and lower initial investment

Deployment of outdoor access points is a complex task that involves cabling, installation and maintenance. The NWA55AXE simplifies the process with its Smart Mesh Technology and external, detachable antennas that save your effort to install and adjust signal patterns. This makes NWA55AXE an ideal solution to extend reliable wireless connectivity to outdoor environments at an affordable price.

Bringing next generation WiFi within reach

WiFi 6 made tremendous improvement by introducing new technologies, such as orthogonal frequency-division multiple access (OFDMA), and spatial re-use, which is also referred to as Basic Service Set (BSS) coloring. It aims to simultaneously satisfy all requirements from rapidly growing mobile users. Zyxel's NWA55AXE is a true WiFi 6 access point which support essential 11ax functions that delivers faster performance and massive increased capacity, making the user experience even better.

Apart from running at 25% faster speed, NWA55AXE can also maximize WiFi efficiency by allowing simultaneous data transmission for multiple clients; thus, the airtime contention is no longer an issue here.

NebulaFlex - simply manage it your way!

The NebulaFlex provides extended flexibility, allowing users to easily switch between standalone and our intuitive cloud-managed NCC (Nebula Control Center) mode any time according to your needs without additional cost while protecting wireless technology investments.

The Nebula cloud management platform provides centralized control and visibility over all Nebula networking devices. You simply need to register the device on NCC, and it will automatically join, auto provision and begin to give real-time information. The intuitive platform allows you to group your access points together, control centrally, gain access to diagnostics tools and additional features all under a single platform.

Specifications

Model		NWA55AXE	
Product name		802.11ax (WiFi 6) Dual-Radio Outdoor PoE Access Point	
		ZYXEL	
Wireless			
Standard		IEEE 802.11 ax/ac/n/g/b/a	
MIMO		MU-MIMO	
Wireless speed	2.4 GHz	575 Mbps	
	5 GHz	1200 Mbps	
Frequency band	2.4 GHz	• USA (FCC): 2.412 to 2.462 GHz	
	5 GHz	 Europe (ETSI): 2.412 to 2.472 GHz USA (FCC): 5.15 to 5.35 GHz; 5.470 to 5.850 GHz 	
	3 GHZ	• European (ETSI): 5.15 to 5.35 GHz; 5.470 to 5.725 GHz	
Bandwidth		20-, 40-, 80-MHz	
Conducted typical transmit	US	23/26 dBm	
output power*1 (2.4 GHz/5 GHz)			
(limited by local regulatory EU		20/25 dBm	
requirements)	(2.4 GHz/5 GHz)		
RF Design			
Antenna type		2x2 external antenna	
Antenna gain	2.4 GHz	4 dBi	
	5 GHz	5 dBi	
Minimum receive sensitivity		Min. Rx sensitivity up to -99 dBm	
WLAN Feature			
Band steering		Yes	
WDS/Mesh*2		Yes	
Fast roaming		Yes	
DCS		Yes	
Load balancing		No	
Security			
Encryption		WPA Personal	
		WPA2 Personal WPA3 Personal	
Authentication		No	
Access management		MAC filtering/Rogue AP detection	
Networking			
IPv6		Yes	
VLANs		Yes	
WMM		Yes	
U-APSD		Yes	
	t nower eveludes antenn	a gain. For total (FIPD) transmit nower add antenna gain.	

^{*1:} Conducted typical transmit output power excludes antenna gain. For total (EIRP) transmit power, add antenna gain.

^{*2:} WDS, ZyMesh, Smart Mesh and Industry's Open Mesh, Easy Mesh are different mesh systems that do not work with one another.
