NBG6515

AC750 Dual-Band Wireless Gigabit Router

Are you experiencing slow wireless speeds on your favorite new mobile device? Give it the speed it deserves — upgrade your home network with the Zyxel NBG6515, AC750 Dual-Band Wireless Gigabit Router. Equipped with 802.11ac technology, the NBG6515 boosts wireless speeds to as high as 750 Mbps* on your wireless network.

Benefits

Powered by 802.11ac technology

The Zyxel NBG6515 enables you to utilize wireless technology to achieve faster wireless speeds among the latest wireless mobile devices, which enable smoother HD video streaming, lag-free multiplayer gaming and overall faster wireless online activities.

802.11ac technology for modern wireless mobile devices

Wireless data speeds of up to 750 Mbps*

Powerful, reliable wireless coverage with advanced antennas

Connect wireless devices quickly with the WPS button

Quick, easy to setup

Powerful, reliable wireless coverage with advanced antennas

Equipped with two external antennas (3 dBi: 2.4 GHz, 5 dBi: 5 GHz), the Zyxel NBG6515 provides strong wireless coverage throughout the premises. Enjoy reliable wireless Internet access wherever you are at home.

Powerful, reliable wireless coverage with advanced antennas

Stream and share your digital contents with a USB drive

Connect a USB storage device to the Zyxel NBG6515 for it to share the stored photos, music and videos throughout your network with its DLNA support. It's great for the existing set top boxes or video game consoles with DLNA support to create a connected home theater experience.

Gigabit Ethernet ports for fast wired networks

Create a wired network of up to 1000 Mbps taking advantage of the Zyxel NBG6515's Gigabit Ethernet ports, which ensures your wired network gets the highest data speed for HD video streaming or faster large data transfers.

Supports for access point and repeater modes

Not only does the Zyxel NBG6515 share Internet access, it also acts as a dedicated wireless access point to create a wireless network, upgrade the existing one, or extend your existing wireless network with the repeater mode.

Repeater

Extend Wireless coverage to your router

AP Mode

Connect back to your router to create a new wireless coverage
